5,08mm Eurostyle® Pluggable PCB Terminal Block

Description

These Eurostyle® terminal blocks for PC boards are a 2-piece plug and header system that are polarized. They offer the convenience of pluggability and superior reliability of rising cage pressure clamps for securing wires.

Featuring a new lower profile, the mated vertical plug and header is 69% shorter than standard mated vertical plug and header combination and 45% more narrow than the mated horizontal plug and right angle header.

Made in the USA, all Eurostyle® terminal blocks embody the highest quality standards in the industry - using the finest materials and world class manufacturing processes. They meet or exceed all applicable industry standards.

Features

- **Holds wires for a reliable electrical connection.** The rising cage clamp compresses wires uniformly. Built for repeated engagements, it doesn't damage fine stranded wires.
- **High reliability female contact.** Design analysis and years of service on millions of connectors verify a highly reliable and proven design.
- **Secure retention system resists vibration and wire loads.** Positive latching mechanism features audible and visual mating verification.
- **Polarization feature.** Eliminates potential for mis-mating of plug to header and facilitates blind mating. Custom order for unique plug and header keying.
