**2-CHANNEL DIGITAL INPUT MODULE DC 48 V
POSITIVE SWITCHING CARRIER RAIL DIN 35 CAGE CLAMP CONNECTION**

The digital input module receives the control signal from digital field devices (sensors, etc).

The module is a 2-channel, 4-conductor device and sensors with a ground (earth) wire may be directly connected to the module.

Each input module has a noise-rejection filter with a time constant.

An optocoupler is used for electrical isolation between the bus and the field side.

Attention: An additional supply module must be added for operation with DC 48 V!
