Data sheet

750-585 **2-CHANNEL ANALOG OUTPUT MODULE 0-20 mA**

The analog output module creates intrinsically safe 0-20 mA signals in the hazardous area of Zone 1.
The WAGO-I/O-SYSTEM 750 has to be installed in Zone 2 or in non-hazardous environments.
Outputs are short-circuit-protected.
“Current” analog output modules use power derived from the power jumper contacts.

Indicators: Green LED (output status)
Each output is electrically isolated from the bus by use of optocouplers.

Note: Only use the digital input module in connection with the 24 V DC EEx i supply module 750-625 (note the power supply instructions on page 1.14)!
General information (e.g. installation regulations) on explosion protection is available in the WAGO-I/O-SYSTEM 750 manuals!
